

MSc. Studies

The official postgraduate programme in [Physics of Condensed Matter and Biological Systems](#) is jointly offered by the [Departments of Theoretical Condensed Matter](#), [Condensed Matter](#), and [Instituto Nicolás Cabrera](#) of the [Autonomous Univesity of Madrid](#).

The goal of this programme is to provide graduate students of Physics or related disciplines top level teaching in topical research areas. The focus is on high quality teaching of fundamentals, methodology and technology by internationally recognized experts in condensed matter physics, nanotechnology and biophysics with the aim to understand solids, liquids, and complex biological systems as well as modern topics of Nanoscience and Nanotechnology.
