XXV International Summer School Nicolás Cabrera
Manipulating Light and Matter at the Nanoscale
10th-14th Sept. 2018, Miraflores de la Sierra

Fundación **BBVA**

at pleasure to announce the [XXV International Summer School “Nicolás Cabrera”](#). This series of summer schools, organized by the [Instituto Nicolás Cabrera](#) at the [Universidad Autónoma de Madrid](#) and financed by the Fundación BBVA, deals with current topics in Materials Science since 1994. Next year, it will focus on “Manipulating Light and Matter at the Nanoscale”, and will be held from the 10th to the 14th of September 2018 in Miraflores de la Sierra, Spain (close to Madrid).

This international school aims to provide a broad introduction to current trends in light-matter interactions at the nanoscale to students and young postdocs. A list of confirmed keynote and invited speakers, as well as other details and information, can be found at [INC Summer School 2018](#).

The School will consist of lectures, discussions, and poster sessions, and will last from the morning of Monday, Sep 10, until around noon on Friday, Sep 14. It will include a half-day excursion to a landmark and a traditional dinner in the vicinity of Madrid.

Note that registration is already open. The fee (400€) covers accommodation, meals, and coffee breaks, as well as the school trip and dinner. A limited number of scholarships to waive the registration fee will be available.

If you have any questions, please, do not hesitate to contact us at school@nicolascabrera.es.

TNT 2014 Barcelona - Spain

The 15th edition of Trends in Nanotechnology International Conference (TNT2014) is being launched following the overwhelming success of earlier Nanotechnology Conferences. The TNT2014 edition will take place in Barcelona (Spain).

This high-level scientific meeting series aims to present a broad range of current research in Nanoscience and Nanotechnology as well as related policies (European Commission, etc.) or other kind of initiatives (iNANO, nanoGUNE, MANA, GDR-I, etc.). TNT events have demonstrated that they are particularly effective in transmitting information and establishing contacts among workers in this field.

The TNT2014 structure will keep the fundamental features of the previous editions, providing a unique opportunity for broad interaction.
